

# TECHNICAL DATA SHEET FOR: Fuel Tanks

Rigorously maintained, we carry a large fleet of the latest specification tanks from 1000 to 20000 litres, to ensure the safe and efficient delivery of fuel to our equipment. All tanks are banded to eliminate the risk of spillage and subsequent site contamination.

Fuel Tank Size (litres)	Dimensions L x W x H (mm)	Empty Weight (kg)	Full Weight (kg)	Capacity Brim Full (litres)
1000	1159 x 1150 x 1320	550	1423	990
2000	2300 x 1150 x 1320	862	2662	2000
3000	2300 x 2550 x 1320	991	3691	3000
6000	2240 x 2440 x 2530	1587	6891	6000
10000	3610 x 2440 x 2560	2615	12766	10333
20000	6058 x 2438 x 2438	5500	21800	19400

- Fuel tank sizes: 1000, 2000, 3000, 6000, 10000 and 20000 litres
- Supplied checked and ready to use
- Full of fuel – subject to transport regulations
- Quick release snap-on couplings
- Forklift pockets and lifting eyes
- ADR compliant (transportation of flammable liquids)

- Fully banded and meeting all environmental legislations
- Static tanks or road towable bowsters complete with optional pumps
- National fuel management service available upon request
- Scheduled fuel deliveries
- 4 x 4 vehicles for sites with difficult access
- Fully trained driver with ADR certification
