

# TECHNICAL DATA SHEET FOR: Secure Container

When security on site is an issue, our range of secure containers provide a reassuring solution.

Containers are always fitted with a canopied generator which is unique to John F Hunt Power. We DO NOT fit open sets which create more noise and pose a threat to the safety of operators and technicians alike.

Available to house super silenced generators from 20 kVA up to 100 kVA, our units feature a bunded 1800 – 2000 litre internal fuel tank. Please note: These units are unbranded, there being no indication of what lies within.

- Anti-vandal specification
- 1800 – 2000 litre bulk fuel tank within container
- Fully bunded to contain spillages, so no drip tray is required
- Dimensions: L3660 x W2440 x H2660
- Max Generator Size: 100kVA
- Robust, heavy duty steel construction
- Front access doors with security locks.
- No indication outside as to what is contained within
- GPS tracker option
- Cable entry via gland plate
- Enhanced noise reduction

- Safe design for operators and technicians
- Louvered air intake fitted with integral deflector box.
- 2 high level Exhaust outlets.
- 4 Top lifting points & 2 fork lift pickets in the base.
- Twist lock facility in base of store.
- 10mm earthing boss located either side near air intake panel.
- Cable outlet located either side at front of unit fitted with lockable flap for access W200 x H250.
- 2" BSP fill point including non return valve and cap.
- 460mm bolted service hatch.

Max Generator Size	Dimensions L x W x H (mm)	Empty Weight (kg)	Tank Capacity (litres)
100 kVA	3660 x 2440 x 2660	2079	1800 - 2000
