

800kVA

HazSpec Generator with added **Safety Features**

Feature

- Hot dip galvanised sound attenuated enclosure
- Bunded 1700 litre base fuel tank with 3 way valve
- 4 Base lift points
- 4 Pole circuit breaker with earth leakage Protection with on off switch
- Deep sea 8610 load share control panel
- Plastic coated locks and handles. Lockable canopy with common single key
- Racor filter
- 50/60 Hz switchable
- Low water level alarm
- Low oil level alarm
- Cummins water separator filter
- Sump oil vac pump
- Battery isolator
- Low oil pressure sensor
- Water temperature sensor
- CT for genset paralleling
- Hardwire via copper busbar
- Microswitch protection
- Motorized MCCB
- Alternator anti condensation heater
- Battery charger
- R731 3 phase regulator
- Alternator Ref: LEROY SOMER / MECC ALTE

We stock a range of generators with a bespoke "HazSpec" specification to combat the serious safety risk of operating diesel generators in hazardous or explosive environments.

Chalwyn valves and spark arrestors have been factory fitted to our John F Hunt Power specification Fusteq generators to create our exclusive "HazSpec" units.

On these HazSpec generators, the chalwyn valve blocks the air intake system, cutting off all air intake along with potential external fuel sources; whilst the spark arrestors prevent the emission of flammable debris from the engine.

Standby kVA	Prime Power kVA	Engine Make / Type	Governor	Tank Capacity (Litre)	Fuel Consumption per hour (Litre)			dBA @ 7m	Size (mm)	Wet Weight (kg)
